Subject: Proposed Plan for the East Waterway

Greetings,

As a resident of this land near the Duwamish River; I am urging you to go forward with the proposed cleanup plan for the East Waterway. This is absolutely necessary for the health of the community impacted by the pollution levels and is concurrent with state policy and the will of the people. That polluters are trying to reverse this course is criminal. It is essential that this plan be implemented.

Thank you and take care,
